Wacky Tacky Immune System

The immune centers of your body are located in the _____^{Noun - Plural}_____, _____^{Noun}_____, _____^{Adjective}_____, and bone marrow. From these centers your immune cells circulate around your body, looking for the " _____^{Adjective} _____^{Noun - Plural}" , foreign bodies, or antigens which can appear in the form of _____^{Noun - Plural}_____, _____^{Noun - Plural}_____, and even _____^{Noun}_____. When a disease is _____^{Verb - Past Participle}_____ by your _____^{Adjective} _____^{Noun - Plural}_____ their response depends both on the disease and on the particular immune cell. Phagocytes (a type of white blood cell) actually _____^{Verb - Past Tense}_____, _____^{Verb}_____, or eat pathogens. Phagocytes also consume "dead cells" in our body, and play an important roll in allowing wounds to heal. Lymphocytes _____^{Noun}_____ antigens by creating antibodies, or _____^{Adjective}_____ granules. Lymphocytes also destroy cells which have been _____^{Verb - Past Participle}_____ by a virus, and tag antigens to be attacked later. After _____^{Verb - Present Tense}_____ a particular disease lymphocytes will keep a profile and _____^{Verb}_____ the disease throughout your life. Should it appear again, they will _____^{Adverb}_____ eliminate it. This _____^{Noun}_____ effect of immune cells led to the idea of a vaccine: weakened antigens which could be _____^{Verb - Past Participle}_____ into your body. Your immune system can then " _____^{Verb}_____ " on this _____^{Verb - Past Participle}_____ form of a disease. The next time a disease _____^{Verb - 3rd Person Singular Present}_____ your body, your immune system draws upon its memory to quickly _____^{Verb}_____ it.
