# Tree Hugger Billy

Once upon a time, there was a little Noun called Billy and he was very Adjective about the environment. He liked to create blogs about how to Verb energy and how people don't care about the environment. When he grew up he started to create a company named Tree Huggers. It was a company where people get to be free with their criticising to the Noun about what they are doing. That company got shut down so he started to build a gym for people who like to save the environment. He went outside to find trees being knocked down. He got a great idea, he would Verb a tree for the rest of his life so they can't chop it down. He started it the next Noun and it headlined the news and many people protesting. Billy was the number one hit on TV around the world. Tom Cruise tried to Verb him to do something else but it didn't work even Winny The Poo tried. One month later the Noun moved in and cut down the tree. The Noun fell on Billy and squashed him in the ground and made his own grave. Everyone then referred to him as Tree Hugger Billy.
