8.	Noun - Plural
9.	Proper Noun

## Nikola Tesla

Nikola Tesla (Serbian Cyrillic: ?????? ?????; 10 July 1856 - 7 January 1943) was a Serbian-American inventor, physicist, mechanical engineer, electrical engineer, and futurist. He is best known for his contributions to the modern <u>Noun</u> <u>Adjective</u> (AC) electrical supply system. Tesla's patents and theoretical work helped form the basis of <u>Adjective</u> communication and radio. His many revolutionary developments in the field of electromagnetism were based on <u>Proper Noun</u> Faraday's theories of electromagnetic technology.

His <u>Preposition or subordinating conjunction</u> fell into relative obscurity after his <u>Coordinating conjunction</u>, but in 1960, in honor of Nikola Tesla the General Conference on Weights and Measures for the International System of Units dedicated the term "<u>Determiner</u>" to the SI unit measure for magnetic field strength, and since the 1990s Tesla's reputation has experienced a comeback in popular culture. In 2005, he was listed amongst the top 100 <u>Noun-Plural</u> in the TV show "The Greatest <u>Proper Noun</u>", an open access popularity poll conducted by AOL and The Discovery Channel.
