# Gravity

Gravity is a basic \_\_\_\_\_  
Noun in the universe that attracts all \_\_\_\_\_  
Noun - Plural to each other. You stay on  
the \_\_\_\_\_  
Noun because of the attraction between your \_\_\_\_\_  
Noun and the \_\_\_\_\_  
Location. As  
\_\_\_\_\_  
Noun objects get further apart, the \_\_\_\_\_  
Adjective force between them gets smaller. It never gets to  
zero; it just gets too small to matter. This is why astronauts seem to be \_\_\_\_\_  
Adjective in space. They are not  
\_\_\_\_\_  
Number; they are simply \_\_\_\_\_  
Verb - Present ends in ING AROUND the earth. Because the amount of  
gravity depends on your \_\_\_\_\_  
Noun, your weight is \_\_\_\_\_  
Adjective depending on how far away you are  
from \_\_\_\_\_  
Location
