# social problems

Social problems

This \_\_\_\_\_takes \_\_\_\_\_in the \_\_\_\_\_named little \_\_\_\_\_; our young  
\_\_\_\_\_named \_\_\_\_\_was partying in the \_\_\_\_\_of his best friend named \_\_\_\_\_.

You see \_\_\_\_\_was invisible to many people literally, this had interrupted \_\_\_\_\_social life for  
many years until he met howl when he was only 6 years old, they didnâ??t find each other just like any other set  
of

friends, when howl was climbing on a tree spitting on people down below just as any other day of summer he spent alone. One day he missed, now as you might have guessed calcsifer was sitting down below minding his own business just as any other day he spent in his whole entire life. Now as you might have guessed, the saliva that came out of howls mouth landed onto the top of calcsifers head. "What was that?" calcsifer said. And as you might have known calcsifer had blurted out something from the shock of the warm liquid coming from howls mouth, and of course after that calcsifer noticed a boy who looked the same age as him was hanging from above. After that they ended up getting into a furious conversation, which in the end ended up being a friendly conversation which led to texts, chilling out together, and of course awesome parties. This ended up being a real good friendship.
