## **Mars Mad Libs**

1. Adjective	
--------------	--

## **Mars Mad Libs**

Mars is theAdjective	planet. It is the fourth planet from the sun. Mars has two moons. Mars has iron
inside it and in its soil which	ch gives it a red, rocky appearance. Some scientists think that there was life on Mars
To try and prove that there	was life on Mars, NASA sent a rover to Mars. Over the years they have sent many
rovers and the current rove	r on Mars is Curiosity. Mars, surprisingly, actually has some ice caps in its surface.
Mars also has some canyor	ns and volcanos. Its air is very thin, and a human could not breathe there. In the
afternoon and night on Man	rs, the temperature is in the negatives. Mars is a very interesting planet. Maybe
someday you will become	an astronaut, and go to MARS!!!!!
