# Weather Controller

There once was a \_\_\_\_\_<sup>Noun</sup> that could control the weather. He was a smart \_\_\_\_\_<sup>Noun</sup> and nobody could tell him what to do. If someone tried, he hid in his favorite hole, the \_\_\_\_\_<sup>Noun</sup> hole. When the little \_\_\_\_\_<sup>Noun</sup> went in the rain hole, it rained until he came out of the rain whole, or crawled into a different hole underground. The \_\_\_\_\_<sup>Noun</sup> \_\_\_\_\_<sup>Noun</sup> favorite whole, for when someone \_\_\_\_\_<sup>Noun</sup> him, was the snow hole.

Some people actually thought the \_\_\_\_\_<sup>Noun</sup> came from a different planet. A planet called Zubuntu.

\_\_\_\_\_<sup>Noun</sup> is a groundhog planet that newspaper writers made up. When a little girl was in a field

\_\_\_\_\_<sup>Noun</sup> corn on a \_\_\_\_\_<sup>Noun</sup> \_\_\_\_\_<sup>Noun</sup> day, the \_\_\_\_\_<sup>Noun</sup> saw her and tried to hide but she

saw him. He was a \_\_\_\_\_<sup>Noun</sup> \_\_\_\_\_<sup>Noun</sup> and he wanted her to leave, so he made it hail. The

\_\_\_\_\_<sup>Noun</sup> ran away yelling, \_\_\_\_\_<sup>Noun</sup> \_\_\_\_\_<sup>Noun</sup> That made the \_\_\_\_\_<sup>Noun</sup> upset and so he made

the weather -27 degrees for 3 weeks in time.

The people in the local town he was in \_\_\_\_\_<sup>Noun</sup> were nice to the ground hog and the people actually felt it

getting warmer by the minute! When the people were nice, the \_\_\_\_\_<sup>Noun</sup> was nice. So the Seneraryins were

nice to the groundhog from then on out. They even named him \_\_\_\_\_<sup>Noun</sup>. \_\_\_\_\_<sup>Noun</sup> loved his name

and was friendly and only for 30 minutes a day, there was bad weather and it was always at \_\_\_\_\_<sup>Noun</sup>

\_\_\_\_\_<sup>Noun</sup>.
