Electronic Surveillance

National Security officials have long had the legal authority to listen in on the conversations of _____ Noun -
Plural _____ and _____ Noun - Plural _____. The Communications Assistance to Law Enforcement Act allows for lawful
interception of communications and applies to _____ Noun - Plural _____ and providers of broadband internet. With
the explosion of _____ Noun _____, however, officials say their ability to monitor communications is "going dark,"
cutting them off from critical conversations between _____ Noun - Plural _____ and hindering their investigations.
Communications service providers like Blackberry's _____ Verb - Base Form _____ in Motion, _____ Proper Noun _____ and
_____ Proper Noun _____ must currently comply with _____ Adjective _____ surveillance requests, but two major obstacles
can hinder the process. First, not every service provider currently has _____ Noun _____ built into their technical
design; therefore, complying with requests can be a _____ Adjective _____ drawn-out process. Further, some
companies offer _____ Noun _____ that are encrypted between users, so they are unable to decipher the
communications even after they grab them. National security and law enforcement officials, including those at
the _____ Proper Noun _____ and _____ Proper Noun _____, seek new laws compelling companies to be technically capable
of complying with lawful surveillance request; that is, having the ability to both _____ Verb - Base Form _____ and
_____ Verb - Base Form _____ _____ Proper Noun - Plural _____.
