

## **a story**

1. Verb - Present Ends In S

## a story

If there's one thing about weddings that bothers me...well, wait. That Verb - Present ends in S there's just one thing about weddings that bothers me and there are heaps... Let's try it this way... One of the many things I dislike about weddings is the amount of money people spend on fancy-schmancy invitations. Oh yes, and also how boring those invitations usually are.

So when it came time to pick ours, Mr W was completely and totally on board when I suggested doing them ourselves. I've got a decent eye for design and hello...I'm a marketer by trade. Seems like I ought to be able to market our wedding day to friends and family, right?

I'll save the entire invitation process for another day. I plan on making the file downloads from my design available for free, but I'll need to look up the fonts and such first.

For today, let's focus in on the RSVP card.

We'd had some fun with the wording and the design of our invitation, and we knew we were going to be having an extremely laid back wedding day, so we wanted something that would set the tone for our guests ahead of time. While wracking our brains for some creative ways to word the card, Mr W suggested we let the guests word it.
