# Finding our way around math

Once upon a time on a \_\_\_\_\_ Adverb \_\_\_\_\_ sunny day there were two \_\_\_\_\_ Adjective \_\_\_\_\_ men who were \_\_\_\_\_ Verb - Present ends in ING \_\_\_\_\_ Preposition \_\_\_\_\_ the \_\_\_\_\_ Noun \_\_\_\_\_ nearest their \_\_\_\_\_ Noun - Plural \_\_\_\_\_ collecting \_\_\_\_\_ Noun \_\_\_\_\_ for firewood. These young \_\_\_\_\_ Noun - Plural \_\_\_\_\_ were named Andres Celsius and Daniel Gabriel Fahrenheit, they were \_\_\_\_\_ Adjective \_\_\_\_\_ Noun - Plural \_\_\_\_\_ because they \_\_\_\_\_ Verb - Past Tense \_\_\_\_\_ a lot of similar interests such as a fascination with weather, sensation, \_\_\_\_\_ Conjunction \_\_\_\_\_ mathematics; they both \_\_\_\_\_ Verb - Base Form \_\_\_\_\_ intrigue for the stars \_\_\_\_\_ Conjunction \_\_\_\_\_ Adverb \_\_\_\_\_ space and were very \_\_\_\_\_ Adjective \_\_\_\_\_ as to how \_\_\_\_\_ Adjective \_\_\_\_\_ Noun - Plural \_\_\_\_\_ of the \_\_\_\_\_ Noun \_\_\_\_\_ were \_\_\_\_\_ Verb - Past Tense \_\_\_\_\_ by different atmospheric conditions and \_\_\_\_\_ Verb - Past Tense \_\_\_\_\_ Adjective \_\_\_\_\_ Noun \_\_\_\_\_ and \_\_\_\_\_ Noun \_\_\_\_\_ species. On this day Mr. Celsius and Mr. Fahrenheit were \_\_\_\_\_ Verb - Present ends in ING \_\_\_\_\_ the possibility of measuring the \_\_\_\_\_ Proper Noun \_\_\_\_\_ of weather to an \_\_\_\_\_ Adjective \_\_\_\_\_ degree. They both felt that it was possible but had differing \_\_\_\_\_ Noun \_\_\_\_\_ on how it could be \_\_\_\_\_ Adjective \_\_\_\_\_ Verb - Past Tense \_\_\_\_\_. They decided that they would \_\_\_\_\_ Verb - Base Form \_\_\_\_\_ some \_\_\_\_\_ Noun - Plural \_\_\_\_\_ to do with temperature, the varying values of \_\_\_\_\_ Adjective \_\_\_\_\_ and \_\_\_\_\_ Adjective \_\_\_\_\_, to \_\_\_\_\_ Verb - Base Form \_\_\_\_\_ their inquisitiveness. While they were wondering through this thick, \_\_\_\_\_ Verb - Base Form \_\_\_\_\_ Noun \_\_\_\_\_ they piled up on firewood as well as took some \_\_\_\_\_ Noun - Plural \_\_\_\_\_ of damp \_\_\_\_\_ Noun \_\_\_\_\_ and \_\_\_\_\_ Verb - Base Form \_\_\_\_\_, running river water. It was decided that they would \_\_\_\_\_ Verb - Base Form \_\_\_\_\_ systems of \_\_\_\_\_ Verb - Present ends in ING \_\_\_\_\_ temperature and thus they began their journey. After many, \_\_\_\_\_ Adverb \_\_\_\_\_ months of hypothesis, experimentation, trial and error, mathematical processes and trial and error they \_\_\_\_\_ Adverb \_\_\_\_\_ came up with their own ways of \_\_\_\_\_ Verb -

\_\_\_\_\_ Noun in degrees. However, Andres \_\_\_\_\_ Verb - Past Tense that the best way was to record temperature  
in \_\_\_\_\_ Proper Noun and \_\_\_\_\_ Proper Noun said, "No, in fact the very best way is to \_\_\_\_\_ Verb - Base Form  
the \_\_\_\_\_ Noun - Plural of \_\_\_\_\_ Adjective and \_\_\_\_\_ Adjective in Fahrenheit!" The results of this  
\_\_\_\_\_ Noun are that we now have two degree systems for \_\_\_\_\_ Verb - Present ends in ING \_\_\_\_\_ Noun and  
must use mathematical equations to \_\_\_\_\_ Verb - Base Form one into the other. The equations are  $C=(F-32) \times 5/9$ .  
To find Fahrenheit from Celsius we do  $F=(C \times 5/9)+32$ .
