1. Adverb
2. Preposition Or Subordinating Conjunction
3. Adverb
4. Verb - Present Tense
5. Adverb - Comparative

# American International School of Rotterdam.

In this graph I have noticed that it stays \_\_\_\_\_ Adverb constant. I have also notice \_\_\_\_\_ Preposition or

subordinating conjunction \_\_\_\_\_ the air is warmer than the soil and the water. The water and the soil are almost the exact

same temperature. They also always change \_\_\_\_\_ Adverb at the same. So, they are \_\_\_\_\_ Verb - Present Tense

up at the same pace. At first I thought that they would be completely different because soil is a lot thicker than

water. Soil absorbs heat \_\_\_\_\_ Adverb - Comparative because it is thicker.
