# Who We Are

The health care system can be inefficient, costly and difficult to navigate. Community Care of Western North Carolina (CCWNC) is working to change that.

Our model is an \_\_\_\_\_ *Adjective* regional partnership of health care professionals working together to provide coordinated care through the \_\_\_\_\_ *Adjective* care Medical Home.

CCWNC offers care management, pharmacy and quality improvement services. We collaborate with health care providers and the community to deliver high quality, cost effective, accessible care to Medicaid recipients and other populations.

Our care management teams help individuals coordinate their care among various providers, while connecting them to community resources and teaching them to better manage their health care.

We are one of fourteen nonprofit, provider-led networks that make up CCNC.
