Entrepreneurs

After a few years of trial by fire, we've learned a thing or two about what the mobile workforce needs (it's not what we think it needs) and how to build a strong, vibrant community. But we see no point in keeping all this knowledge to ourselves. Instead, we'd rather share it with those just starting out on their coworking journey, whether they're future spaces owners or independent professionals looking for a community to lean on.

In the e-books below, you'll find a wealth of advice, tips, and wonderful stories gathered during our experience of starting and running a _____ Adjective _____ coworking space. You'll also find lots of information about what coworking means for the freelancers, _____ Adjective _____ workers, and _____ Adjective _____ Adjective _____ owners who embrace it, and how it has changed their lives for the better.

And if you're looking for a brain to pick regarding the _____ Adjective _____ way to start building your own _____ Adjective _____ community, be sure to contact Angel about consulting services.
