# Happy Physical Therapy Month!

Physical therapists (PTs) are highly \_\_\_\_\_, licensed health care professionals who can help patients reduce \_\_\_\_\_ and \_\_\_\_\_ or restore \_\_\_\_\_ - in many cases without expensive surgery and often reducing the need for long-term use of prescription \_\_\_\_\_ and their side effects.

Physical therapists can \_\_\_\_\_ patients how to \_\_\_\_\_ or manage their condition so that they will achieve long-term \_\_\_\_\_ benefits. PTs examine each \_\_\_\_\_ and develop a plan, using \_\_\_\_\_ techniques to promote the ability to move, reduce \_\_\_\_\_, restore function, and prevent \_\_\_\_\_. In addition, PTs work with \_\_\_\_\_ to prevent the loss of mobility before it occurs by developing \_\_\_\_\_ and wellness-oriented programs for healthier and more \_\_\_\_\_ lifestyles.

Physical therapists provide care for \_\_\_\_\_ in a variety of settings, including \_\_\_\_\_, private practices, outpatient clinics, home health agencies, \_\_\_\_\_, sports and fitness facilities, work settings, and nursing homes. State licensure is required in each \_\_\_\_\_ in which a physical therapist practices.
