Salem's test

There is a kid names Nicholas. He lives with his mom, dad, brother, and sister. we are testing this software to figure out how to print from Salem's _____ Noun book. if we can't figure it out he'll have to retype his story or do it over which he doesn't have time to do. this would be very disappointing if he had to do that. technology is supposed to be hlepful not cause more work. let's see whether this works or not.
