El Camino de Santiago del Norte is a very Adjective and Adjective route of special natural beauty

. Its topography is very different to El Camino de Santiago Frances which makes it a different experience. El

Camino del Norte follows the North coast of Spain, from the French border in Irun, along the Basque Country,

Cantabria, Asturias and finally Galicia region where the town of Santiago de Compostela is.

El Camino del Norte is a very hilly and sometimes mountainous way with impressive scenarios such as the Picos

de Europa in Asturias which the pilgrim can see on his left as he walks along the cliffs in the coast. In El Camino

del Norte there are many opportunities to have a bath or to relax in small solitary beaches of clean turquoise

water or simply enjoy the view of the sea and the waves hitting the rocks in the cliffs.

For the lovers of nature, forests and green landscapes El Camino del Norte is the perfect track but they should

keep in mind that El Camino del Norte represents a greater physical challenge than El Camino Frances due to the

constant going up and down of the way and also due to its humid Atlantic weather which makes rain quite likely

even in summer months.
