# GigaBot

GigaBot is a/an Adjective / Noun type Pokmon, first introduced to us by your own Family Member! He is known as the Noun Pokmon, for reasons which we cannot disclose in this newsletter at this time. When GigaBot holds a/an Item, and records a voice over in the super Adjective Beatles sound booth, the Noun - Plural all over the world implode. Exposure to Noun - Plural give GigaBot an aggressive, Adjective set of dance moves that may scare off incoming children. However, for the most part, GigaBot is Human Quality and will surely steal a place in your heart!
