Scientists Replace Stale Old Theory with Rousing New One

NEW HAVEN, CT--The universe, an incomprehensible soup of matter and energy nearly 14 billion years old, is just a chunk of _____ Noun in a vast, lumbering piece of software known as Catapult, astronomers announced Wednesday.

"The _____ Verb Base Form _____ Noun is old news," said Dr. Lindsay Smith, a particle _____ Noun at _____ Noun University. "Catapult is _____ Adjective, hip, the Beyoncé of cosmology."

Catapult was initially designed as a fancy shmancy retail _____ Noun system. That's wicked cool and all, but eventually the app got bored of just doing that, so it decided to take over the entire _____ Noun.

Scientists believe there may be an _____ Adjective number of _____ Noun chunks in Catapult, each home to other universes. The app has four _____ Noun, a thin neck, an _____ Adjective head, and a single broad, _____ Adjective _____ Noun on its back, scientists say.

"We're lucky Catapult is lax about personal hygiene," said Dr. Hannah Brilling, a professor of _____ Noun mechanics at Buck Road State University. "One _____ Adjective cosmic Q-Tip and we'd all be goners."

Catapult declined to comment on the _____ Verb Present ends in ING. A spokesman for the creature said it _____ Verb Base Form

its ponderous head and lumbered on with Adjective.
