Pelle Tessuta

Adjective

"This is the companion you will ever travel with.					
In Zegna we have a ritual where new designers visit					
our wool mill, started over a century ago. There was					
a leather expert who was by every aspect					
of the factory production. He was by all means					
a fabric After he visited the mill he					
became with the process of how we make					
the fabrics in the world. He had one of those					
ideas that seem impossible to achieve. But					
he was sure. He loved the wool working					
process. He wanted to do it in leather. He tried to					
put thick strands on the loom but it didn't work, and					
only made it to stop. So he worked on extremely					
thin leather strands. They were so they often					
broke even before starting the loom. But from there,					
he started adding thickness, until he reached the					
perfect dimensions. Sturdy, but thin enough for the					
loom. 2.2 mm strands: the perfect balance.					

and	Adjective	, Pelle Tessuta was b	orn."
