# Three Whimsical Kids

Once upon a time there were three little           Noun Plural          . One           Noun           built a house of           Noun          

while the second           Noun           built his house with           Noun Plural          . They built their houses very

          Adverb           and then           Verb Past Tense           and           Verb Past Tense           all day because they were lazy. The

third little           Noun           worked hard all day and built his house with           Noun Plural          .

A big bad           Noun           saw the two little           Noun Plural           while they           Verb Past Tense           and

          Verb Past Tense           and thought, "What juicy tender           Noun Plural           they will make!" He chased the two

          Noun Plural           and they ran and hid in their houses. The big bad           Noun           went to the first house and

          Verb Past Tense           and           Verb Past Tense           and blew the house down in minutes. The frightened little

          Noun           ran to the second           Noun           house that was made of           Noun Plural          . The big bad

          Noun           now came to this house and           Verb Past Tense           and           Verb Past Tense           and blew the house

down in hardly any time. Now, the two little           Noun Plural           were           Adjective           and ran to the third

          Noun           house that was made of           Noun Plural          .

The big bad           Noun           tried to           Verb Base Form           and           Verb Base Form           and           Verb Base Form          

the house down, but he could not. He kept trying for hours but the house was very           Adjective           and the little

pigs were safe inside. He tried to enter through the           Noun           but the third little           Noun           boiled a big

pot of           Noun           and kept it below the           Noun          . The           Noun           fell into it and           Verb Past

          Tense          .

The two little \_\_\_\_\_ Noun Plural now felt sorry for having been so \_\_\_\_\_ Adjective. They too built their houses with \_\_\_\_\_ Noun Plural and lived \_\_\_\_\_ Adverb ever after.
