# It's About Time

Thousands of \_\_\_\_\_ Noun Plural ago, there were calendars that enabled the ancient \_\_\_\_\_ Noun Plural to divide a year into twelve \_\_\_\_\_ Noun Plural, each month into \_\_\_\_\_ Number weeks, and each week into seven \_\_\_\_\_ Noun Plural. At first, people told time by a sun clock, sometimes known as the \_\_\_\_\_ Noun dial. Ultimately, they invented the great timekeeping devices of today, such as the grandfather \_\_\_\_\_ Noun, the pocket \_\_\_\_\_ Noun, the alarm \_\_\_\_\_ Noun, and, of course, the \_\_\_\_\_ Body-Part watch. Children learn about clocks and time almost before they learn their AB \_\_\_\_\_ Letter of Alphabet 's. They are taught that a day consists of 24 \_\_\_\_\_ Noun Plural, an hour has 60 \_\_\_\_\_ Noun Plural, and a minute has 60 \_\_\_\_\_ Noun Plural. By the time they are in Kindergarten, they know if the big \_\_\_\_\_ Body-Part is at twelve and the little \_\_\_\_\_ Body-Part is at three, that it is \_\_\_\_\_ Number o'clock. I wish we could continue this \_\_\_\_\_ Adjective lesson, but we've run out of \_\_\_\_\_ Noun.
