# Think Again

Once upon a time, there was a \_\_\_\_\_<sup>Noun</sup> merchant who decided to give away his wealth. When his friends, knew about his \_\_\_\_\_<sup>Noun</sup> decision, they \_\_\_\_\_<sup>Noun</sup> to his \_\_\_\_\_<sup>Noun</sup> asking for a piece of the \_\_\_\_\_<sup>Noun</sup>. The \_\_\_\_\_<sup>Noun</sup> man on earth, more than a \_\_\_\_\_<sup>Noun</sup> \_\_\_\_\_<sup>Noun</sup> dollar worth, was the first one there. He was given what he asked for, a few billions. Then came the \_\_\_\_\_<sup>Noun</sup> \_\_\_\_\_<sup>Noun</sup> man for another few billions, then the third and so on. After a handful of our \_\_\_\_\_<sup>Noun</sup> idols were done, the \_\_\_\_\_<sup>Noun</sup> I mean \_\_\_\_\_<sup>Noun</sup> man's wealth was reduced to a mere \_\_\_\_\_<sup>Noun</sup> cents. Very annoyed, he then decided to give up his remaining \_\_\_\_\_<sup>Noun</sup> to as many people as possible. So he drove by to the poorest neighborhood in town, giving a whole cent to the first \_\_\_\_\_<sup>Noun</sup> \_\_\_\_\_<sup>Noun</sup> people he found.

As a matter of fact, the rich man's \_\_\_\_\_<sup>Noun</sup> was almost totally "sucked"; by other \_\_\_\_\_<sup>Noun</sup> people;

And there was another \_\_\_\_\_<sup>Noun</sup> merchant, more prudent, and fond of quantum theory. Just like his generous fellow, he chose to give up his \_\_\_\_\_<sup>Noun</sup>. However, he added a rule as to the distribution of his \_\_\_\_\_<sup>Noun</sup>: any \_\_\_\_\_<sup>Noun</sup> would only be allowed to receive whole \_\_\_\_\_<sup>Noun</sup> of his or her personal \_\_\_\_\_<sup>Noun</sup>. Whoever owns \_\_\_\_\_<sup>Noun</sup> can only receive \_\_\_\_\_<sup>Noun</sup> \_\_\_\_\_<sup>Noun</sup> \_\_\_\_\_<sup>Noun</sup> or any multiple of \_\_\_\_\_<sup>Noun</sup> no circumstances can he get a fraction of \_\_\_\_\_<sup>Noun</sup>.

So

when the \_\_\_\_\_<sup>Noun</sup> man on earth, still thirsty of more \_\_\_\_\_<sup>Noun</sup> knocked at the wise man's door and asked for a few billions, his demand was \_\_\_\_\_<sup>Noun</sup> as he couldn't comply with the new quantum rule: according to this rule, the \_\_\_\_\_<sup>Noun</sup> man on earth can only receive a multiple of his \_\_\_\_\_<sup>Noun</sup> \_\_\_\_\_<sup>Noun</sup> dollar \_\_\_\_\_<sup>Noun</sup>. Since the generous man doesn't have that much funds, the \_\_\_\_\_<sup>Noun</sup> man on earth was sent home without an extra penny.
