Elements

An _____^{Noun} is a _____^{Noun} substance that cannot be broken down into other substances by physical or chemical means. _____^{Noun} are made of only one type of _____^{Noun}. There are _____^{Number} known elements, _____^{Number} of which occur naturally. _____^{First name} _____^{Verb} collected a large amount of information about the elements, such as the number of protons and electrons each element has and the atomic mass of each _____^{Noun}. Also, each _____^{Noun} has a unique _____^{Adjective} and _____^{Adjective}. All of these data, and more, are collected in an organized table called the periodic table of the elements.
