How animals really live

There was a squirrel who lived in the forest. He had many animal friends and they played together every day. One day a family and their cat moved in to the cabin in the forest. At first they thought that they were in danger from the family, but after a while they didn't see any threat so they went on playing. Then one day while the family went out for a picnic by the _____ Noun _____ they left their cat at _____ Noun _____ and they forgot to _____ Verb _____ him. He was growing hungry so he left the _____ Noun _____ to do some hunting. At first he saw a bird sitting on a low branch. He crouched low and quietly _____ Verb _____ up on the bird... then he _____ Verb _____ He _____ Verb _____ the bird in one swift bite to the neck. Then he dragged the bird back to the cabin to eat. The next day all the animals wondered where their friend Bird was. The family moved out of the cabin a month later and the animals never saw their friend again.
