Animal Babies

A few Time period ago I got the best news ever, my Animal was pregnant! The vet told me to give her all the Plural noun and Liquid she wanted and to Verb her Adverb until she was ready to have her Baby animal (plural).

The day came, she was Verb ending in ing and laid down Preposition her Noun to have babies. It was so Adjective The babies came out of her Body part in little Adjective Plural noun. She chewed the little Same plural noun off with her Body part and Past tense verb them! Then the babies crawled over to her Body part (plural) and started Verb ending in ing on them.

One of the puppies had Past tense bodily function in its Same plural noun and when she tore it open she got the Bodily fluid from before all over her Body part. It smelled Adjective.

The most Adjective part was when one can't Adjective and she Past tense verb the whole thing! She started with the Body part and finished with the Body part. They say that birth is Adjective but I think it's actually pretty Adjective.
