

## A Case of More Beer

1. Plural Animal
2. Same Animal Singular
3. Past Tense Verb
4. Adjective Ending In Est
5. Past Tense Verb
6. Adjective
7. Adjective
8. Body Part

# A Case of More Beer

A herd of \_\_\_\_\_  
Plural animal\_\_\_\_\_ can move only as fast as the slowest \_\_\_\_\_  
Same animal singular\_\_\_\_\_ and when the herd  
is \_\_\_\_\_  
Past tense verb\_\_\_\_\_ it is the slowest and \_\_\_\_\_  
Adjective ending in est\_\_\_\_\_ ones at the back that are \_\_\_\_\_  
Past tense\_\_\_\_\_  
\_\_\_\_\_ first. This \_\_\_\_\_  
Adjective\_\_\_\_\_ selection is good for the herd as a whole, because the general speed and  
health of the \_\_\_\_\_  
Adjective\_\_\_\_\_ group keeps improving by the regular culling of the \_\_\_\_\_  
adjective ending in est\_\_\_\_\_  
members.

In much the same way the human \_\_\_\_\_  
Body part\_\_\_\_\_ can only operate as fast as the slowest \_\_\_\_\_  
body part\_\_\_\_\_ cells.  
Excessive intake of alcohol, we all know, kills off \_\_\_\_\_  
body part\_\_\_\_\_ cells, but naturally it attacks the slowest and  
weakest \_\_\_\_\_  
body part\_\_\_\_\_ cells first.

In this way, regular consumption of beer eliminates the weaker \_\_\_\_\_  
body part\_\_\_\_\_ cells, constantly making the  
\_\_\_\_\_  
body part\_\_\_\_\_ a faster and more efficient machine.
