# Climate

Climate has always had a profound effect on \_\_\_\_\_<sup>Noun</sup> in America. The first people arrived in America around \_\_\_\_\_<sup>Number</sup> years ago. During that time, two \_\_\_\_\_<sup>Adjective</sup> ice \_\_\_\_\_<sup>Plural noun</sup> that were nearly two miles thick in places covered much of North America. One ice sheet followed the coastal mountains from Alaska to Washington State, and another extended from the \_\_\_\_\_<sup>Adjective</sup> \_\_\_\_\_<sup>Noun</sup> of the Rocky Mountains to the Atlantic Ocean and from the Arctic Ocean to Ohio. Because so much water was \_\_\_\_\_<sup>Verb (past tense)</sup> up on land in ice sheets, the sea level was about 350 feet lower at the peak of the last ice age about \_\_\_\_\_<sup>Number</sup> years ago than it is today. The lowered sea \_\_\_\_\_<sup>Verb (past tense)</sup> a \_\_\_\_\_<sup>Adjective</sup> \_\_\_\_\_<sup>Noun</sup> between Siberia and Alaska, creating a land bridge across the Bering Sea. Genetic, linguistic, and fossil evidence suggests that the first humans in America came from \_\_\_\_\_<sup>Location</sup> and it is likely that the ice age climate made it possible for these people to \_\_\_\_\_<sup>Verb</sup> across the \_\_\_\_\_<sup>Plural noun</sup> between Siberia and Alaska. After crossing this plain, these hardy people could have made their way south past the \_\_\_\_\_<sup>Adjective</sup> \_\_\_\_\_<sup>Plural noun</sup> and spread across America.
