# simertry

once there was a           Noun           he was weird indeed. He was so           First name           he fought about simitry over  
and           Article           again. he protested it was           Number           two things looked different but the others beg to  
differ.           Year           he died of           Pronoun           and never found out what simitry ments or evan           Event          .
