# Water Droplet

Hello, my name is "George Kinsworth,"; and I am a water droplet. One day I was \_\_\_\_\_  
with my friend \_\_\_\_\_ when all of a sudden I felt really warm. I then realized I was being evaporated. I hate EVAPORATION because I feel all whoozy. I then realized I was in the CONDENSATION part of the HYDROLOGICAL CYCLE. I met someone named \_\_\_\_\_; and she was a \_\_\_\_\_  
\_\_\_\_\_ droplet. She was very talented, and \_\_\_\_\_. She has been to many \_\_\_\_\_ places such as: a TRIBUTARY, a marsh, a SATURATED ZONE, a PERMEABLE LAYER, oceans, lakes, and rivers. I have been in oceans, lakes, and rivers, but never the rest. We found some things we have in common, we both hate WATER POLLUTION, and we both love WATER CONSERVATION. Some places we both wanted to visit were: an AQUIFER, RESERVOIR, WETLAND, and RUNOFF. We thought they would be \_\_\_\_\_. We then realized that we were precipitating as \_\_\_\_\_ into a reservoir! Finally! We both got to go somewhere we've longed to go! It was \_\_\_\_\_. We had such a \_\_\_\_\_ journey. It wasn't over yet, though. Later, we had \_\_\_\_\_ children and we lived happily ever after.
